

Third-Party Distribution Q2 2026 Newsletter

Updates

- Upcoming breaking changes for Hilton Property Content API consumers- Please review field changes in the email with subject "Action Required for Hilton Property Content API Breaking Changes by 22 Apr 2026". Planned updates are available in STG
- We will be migrating from Basic to Bearer authentication via JSON Web Tokens (JWT) later this year. You can review API token auth info [here](#) to get started
- Special thanks to all our XML partners who have migrated to Hilton's JSON API this past year!

Trending Issue – 403 “Resource Forbidden” Errors

Here are some causes and solutions for common HTTP 403 errors:

- IP address has not been whitelisted
 - Solution: submit a request via our [Production Support Page](#)
- Your application does not have access to the endpoint
 - Solution: reference this [page](#) to verify your account access; if you would like access to additional endpoints, please contact your account manager
- Modifying or canceling a booking that has additional room(s) added by property
 - Solution: booking can be updated by contacting the hotel

Tips and Reminders

- We offer [Quick Start Guides](#) for overviews of all API functions
- To add or update emails receiving Hilton maintenance & outage updates, please email: API_Request@Hilton.com and include your partner name or Client ID
